EDUCATION

JAYPEE INSTITUTE OF INFORMATION TECHNOLOGY
B.Tech. in Computer Science and Engineering (Honours)
Cumulative GPA: 8.3 | July 2021

LA MARTINIERE COLLEGE
Indian School Certificate Board
Percentage: 92% | May 2017

COURSEWORK

- Advanced Data Structures
- Algorithms and Problem Solving
- Computer Networking
- Computer Org. & Architecture
- Operating Systems
- Theory of Programming Languages

PUBLICATIONS

KEPs
- *Dynamic Cardinality Enforcement*
- *GA* `custom.metrics.k8s.io`
- *GA* `external.metrics.k8s.io`
- *Resource State Metrics*

OEPs
- *Metrics Collection Profiles*
- *Optional Monitoring Capability*

CERTIFICATIONS

Program Committee Member
- *KubeCon+CloudNativeCon India*
- *KubeCon+CloudNativeCon EU*
- *KubeCon+CloudNativeCon China*
- *KubeCon+CloudNativeCon India*

Speaker
- *KubeCon + CloudNativeCon EU*

Ambassador
- *CNCF Ambassador - H1 cohort*

Recipient
- D.N. Shukla award for Mathematics, La Martiniere College, India

VOLUNTEERING

Emeritus
- *The Public Laboratory for Open Technology and Science, USA*

Mentor
- *Winter of Code, IIT Kharagpur, India*
- *Winter of Code, IIT Patna, India*

EXPERIENCE

Red Hat | Senior Software Engineer
July 2021 – Present
- Working on OpenShift's machine ecosystem in the Cluster API team, including *upstream work* and cross-team enablement.
- Worked on the in-cluster monitoring stack in the Monitoring team, with maintenance responsibilities across the Kubernetes and Prometheus ecosystems.
- Worked on the managed services offerings in the Storage team, built on open-source technologies such as Rook and NooBaa.
- Worked on the OpenShift Data Federation, OpenShift Container Storage, and Multi-Cloud Object Gateway in the Storage team, as an intern.

Kubernetes | SIG Instrumentation Emeritus Chair
November 2022 – September 2026
- Drove multiple *KEPs*, and helped revive historically under-maintained codebases.
- Led design discussions and feature development across *SIG-owned sub-projects* and Instrumentation APIs.

Prometheus | Emeritus Maintainer
March 2026 – September 2026
- Primarily oversaw Kubernetes-related features in Prometheus, focused on Kubernetes Service Discovery.
- Contributed extensively to *node_exporter* and *procfs*. Also set up *end-to-end test coverage* for FreeBSD, OpenBSD, NetBSD, DragonFly BSD, Solaris, and macOS.

Node.js | Emeritus Maintainer
July 2020 – July 2022
- Contributed to core modules including `buffer`, `stream`, and `http` through their respective working groups.
- Collaborated with `express.js` maintainers to extend *HTTP/2 compatibility*.

Outreachy; Google Code-In; The Linux Foundation | Mentor
May 2019 – November 2026
- Guided mentees on design patterns and open-source development through structured tasks and direct feedback.
- Helped unblock contributions and fostered a collaborative learning environment through open discussion and sustained support.

Google Summer of Code | Student
May 2019 – August 2019
- Developed *image and video-matching utilities*, as well as *native* and *inline* WYSIWYG editors.
- Implemented key features including metadata extraction, automated geo-positioning, and Google Mutant integration, enabling the next major release of *in-house image modules*.
