EDUCATION

JAYPEE INSTITUTE OF INFORMATION TECHNOLOGY
B.TECH. IN COMPUTER SCIENCE AND ENGINEERING (HONOURS)
Cumulative GPA: **8.3** | July 2021

LA MARTINIÈRE COLLEGE
INDIAN SCHOOL CERTIFICATE BOARD
Percentage: **92%** | May 2017

COURSEWORK

- Advanced Data Structures
- Algorithms and Problem Solving
- Computer Networking
- Computer Org. & Architecture
- Operating Systems
- Theory of Programming Languages

PUBLICATIONS

KEPs

- *Dynamic Cardinality Enforcement*
- *GA `custom.metrics.k8s.io`*
- *GA `external.metrics.k8s.io`*
- *Resource State Metrics*

OEPs

- *Metrics Collection Profiles*
- *Optional Monitoring Capability*

CERTIFICATIONS

Program Committee Member

- KubeCon + CloudNativeCon EU
- KubeCon + CloudNativeCon China
- KubeCon + CloudNativeCon India

Speaker

- KubeCon + CloudNativeCon EU

Ambassador

- CNCF Ambassador - H1 cohort

Recipient

- D.N. Shukla award for Mathematics, La Martiniere College, India

VOLUNTEERING

Emeritus

- The Public Laboratory for Open Technology and Science, USA

Mentor

- Winter of Code, IIT Kharagpur, India
- Winter of Code, IIT Patna, India

EXPERIENCE

Red Hat | SENIOR SOFTWARE ENGINEER

July 2021 – Present

- Contribute to OpenShift's in-cluster monitoring stack on the Monitoring team, including upstream work and cross-team enablement.
- Previously worked on the Storage team, focusing on controllers and managed services built on open-source technologies such as Rook and NooBaa.
- Earlier, as a Software Engineering Intern (January to July '21), contributed to dashboards and operator backends across OpenShift Data Federation, OpenShift Container Storage, and Multi-Cloud Object Gateway.

Kubernetes | SIG INSTRUMENTATION CHAIR

November 2022 – Present

- Lead technical discussions, architectural decisions, and feature development across *SIG-owned sub-projects* and Kubernetes Instrumentation APIs.
- Drive architectural proposals and enhancement efforts, author and review multiple KEPs, and help revive and guide contributions to historically under-maintained or dormant components.

Prometheus | MAINTAINER

March 2026 – Present

- Primarily oversee Kubernetes-related features in Prometheus, focused on Kubernetes Service Discovery.
- Contribute extensively to *node_exporter* and *procfs*, including *adding end-to-end test coverage* for FreeBSD, OpenBSD, NetBSD, DragonFly BSD, Solaris, and macOS.

Node.js | EMERITUS

July 2020 – July 2022

- Contributed to core modules including *buffer*, *stream*, and *http* through their respective working groups.
- Collaborated with *express.js* maintainers to *extend HTTP/2 compatibility* and played a key role in triaging core module issues and stabilizing CI pipelines.

Outreachy | MENTOR

May 2019 – Aug 2019

- Mentored interns contributing user-facing features across Public Lab's community platforms.
- Guided contributors through Git workflows, deployment automation, and effective open-source collaboration practices.

Google Code-In | MENTOR

Dec 2019 – Jan 2020

- Mentored Public Lab students on JavaScript fundamentals and open-source development through structured tasks and direct feedback.
- Helped unblock contributions and fostered a collaborative learning environment through open discussion and sustained support.

Google Summer of Code | STUDENT

May 2019 – Aug 2019

- Developed *matcher*, an image and video matching utility, and contributed to Public Lab's *native* and *inline* WYSIWYG editors.
- Implemented key features including metadata extraction, automated geo-positioning, and Google Mutant integration, enabling the next major release of *Leaflet.DistortableImage*.
