EDUCATION

JAYPEE INSTITUTE OF INFORMATION TECHNOLOGY
B.TECH. IN COMPUTER SCIENCE AND ENGINEERING (HONOURS)
Cumulative GPA: **8.3** | July 2021

LA MARTINIERE COLLEGE
INDIAN SCHOOL CERTIFICATE BOARD
Cumulative %age: **92%** | May 2017

COURSEWORK

- Advanced Data Structures
- Algorithms and Problem Solving
- Computer Networking
- Computer Org. & Architecture
- Operating Systems
- Theory of Programming Languages

PUBLICATIONS

KEPs

- Dynamic Cardinality Enforcement
- GA *custom.metrics.k8s.io*
- GA *external.metrics.k8s.io*
- Resource State Metrics

OEPs

- Metrics Collection Profiles
- Optional Monitoring Capability

CERTIFICATIONS

Program Committee Member

- KubeCon + CloudNativeCon Europe
- KubeCon + CloudNativeCon China
- KubeCon + CloudNativeCon India

Speaker

- KubeCon + CloudNativeCon Europe

Ambassador

- CNCF Ambassador - H1 cohort

Recipient

- D.N. Shukla award for Mathematics, La Martiniere College, Lucknow, India

VOLUNTEERING

Emeritus

- The Public Laboratory for Open Technology and Science, USA

Mentor

- Winter of Code, IIT Kharagpur, India
- Winter of Code, IIT Patna, India

EXPERIENCE

Red Hat | SENIOR SOFTWARE ENGINEER

July 2021 – Present

- Contributed to the development and maintenance of the in-cluster monitoring stack for OpenShift Container Platform as part of the Monitoring team. Responsibilities include upstream contributions and cross-team enablement to help internal stakeholders make optimal use of the platform.
- Previously worked on the Storage team, focusing on Kubernetes operators and managed services based on open-source solutions such as Rook and NooBaa.
- As a Software Engineering Intern (from January 2021 to July 2021), contributed to dashboards and operator backends across OpenShift Data Federation, OpenShift Container Storage, and Multi-Cloud Object Gateway.

Kubernetes | SIG INSTRUMENTATION CHAIR

November 2022 – Present

- Special Interest Group (SIG) Instrumentation Chair, responsible for leading technical discussions, architectural decisions, and feature development across *SIG-owned sub-projects* and Kubernetes Instrumentation APIs.
- Spearheaded architectural proposals and enhancement efforts; authored and reviewed multiple KEPs while reviving and guiding contributions to historically under-maintained or dormant components.

Prometheus | MAINTAINER

November 2022 – Present

- Special Interest Group (SIG) Instrumentation Chair, responsible for leading technical discussions, architectural decisions, and feature development across *SIG-owned sub-projects* and Kubernetes Instrumentation APIs.
- Spearheaded architectural proposals and enhancement efforts; authored and reviewed multiple KEPs while reviving and guiding contributions to historically under-maintained or dormant components.

Node.js | EMERITUS

July 2020 – July 2022

- Contributed to core Node.js modules including Buffer, Streams, HTTP/1, HTTP/2, Readline, and URL as part of the HTTP, Streams, and Testing Working Groups.
- Collaborated with Express.js maintainers to *extend HTTP/2 compatibility* and played a key role in triaging core module issues and stabilizing CI pipelines.

Outreachy | MENTOR

May 2019 – Aug 2019

- Mentored interns on contributing to user-facing features across Public Lab's community platforms.
- Guided them through Git workflows, deployment automation, and effective open-source collaboration practices.

Google Code-In | MENTOR

Dec 2019 – Jan 2020

- Mentored students on JavaScript fundamentals and open-source development through structured tasks and guided feedback.
- Facilitated contributions by removing blockers and fostering a collaborative learning environment with open discussions and ongoing support.

Google Summer of Code | STUDENT

May 2019 – Aug 2019

- Developed *matcher*, a stream-based image processing library and CLI utility for image-to-image and video matching. Also contributed to PublicLab's *native* and *inline* WYSIWYG editors.
- Implemented key features including metadata extraction, automated geo-positioning, and Google Mutant integration, enabling the next major release of *Leaflet.DistortableImage*.
